EXPERIENCE

MERN Stack Developer
Scizers IOT Pvt. Ltd.

06/2023 - 09/2023
Achievements/Tasks
- In my role as a Full Stack Developer specializing in the MERN stack (MongoDB, Express.js, React.js, Node.js), I played a key role in designing and implementing intuitive and responsive user interfaces for web applications. Also specialising in creating API's using CRUD operations and providing backend solutions.

Frontend Developer
Prayagraj Xport

11/2023 - Present   *Technologies: Tailwind CSS, React.js, Next.js*

Achievements/Tasks
- As a Front-end Developer, I am specializing in React.js, Next.js, and Tailwind CSS. Skilled in crafting user-friendly interfaces with the efficiency of Tailwind CSS. Collaborative team player committed to creating visually appealing and responsive web applications. Stay updated on industry trends to bring innovation to frontend development.

PROJECTS

Astroganesh (Present)
Astroganesh is a platform where you can get solutions to your problems by chatting with the India's top astrologers. At Astroganesh I am focusing on integrating API's and elevating the user experience for astrology enthusiasts. I enhanced features like Kundli Chat and contributing to the platform's success in astrologer-related services. I thrived in a collaborative team environment, fostering innovation and achieving collective success .
Skills involved : Tailwind CSS, React.js, Next.js

StudyNotion (EdTech)
The EdTech platform connects students with diverse courses and equips instructors with tools to create, manage, and sell content. Students can easily search, purchase, and enroll in courses through an intuitive interface with advanced filters and detailed descriptions. Instructors use a dashboard to upload materials, set pricing, and track sales. The platform supports secure payments, interactive forums, live Q&A, and reviews. ***Skills involved : React, Tailwind CSS, JavaScript, Rest API***

Weather Application
Developed a dynamic and user-friendly Weather Application using JavaScript, HTML, and CSS, which leverages a weather API to provide real-time weather information. This project showcases my proficiency in front-end web development, API integration, and responsive design techniques. We can search any city weather in this app. ***Skills involved : Tailwind CSS, JavaScript, fetch API***
